

Hamza Ahmed

Senior Mobile & Frontend Engineer — React Native / React.js / Flutter

hamzaahmed4095@gmail.com | +92-307-015-9904 | [LinkedIn](#) | [GitHub](#) | Remote-ready (Open to Mid/Night Shift)

SUMMARY

Senior Mobile & Frontend Engineer with 6+ years shipping production-grade React Native and React.js applications end-to-end. Strong background in TDD, unit/integration/E2E testing (Detox), white-label multi-tenant architecture, custom native modules, and Expo/CLI workflows. Works AI-first — using Cursor, OpenCode, Antigravity, and Claude/ChatGPT daily to scaffold, test, refactor, and document code faster without compromising quality. Comfortable owning features from idea through implementation, testing, and release in fast-moving, workflow-heavy product environments.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, HTML, CSS, responsive & component-driven UI
- Mobile: React Native (CLI & Expo), Flutter, Swift, Kotlin, custom native modules/bridges, SQLite
- Backend / APIs: Node.js, Express, NestJS, MongoDB, SQL, Supabase, REST API integration
- Testing & Quality: TDD, Unit & Integration Testing, E2E Testing (Detox), Sentry
- Architecture & Delivery: White-Label & Multi-Tenant Theming, OTA Updates (CodePush), CI/CD-minded release ownership
- AI-First Engineering: Cursor, OpenCode, Antigravity, Claude, ChatGPT — for scaffolding, test generation, refactoring, and documentation
- Core Integrations: VoIP (Twilio/CallKit), Google Maps, Mapbox Navigation, WebRTC, LiveKit, Socket.io, Firebase, Stripe

EXPERIENCE

Senior Mobile Engineer | Gotech (Remote)

Apr 2026 – Present

- Contributing to mobile architecture, feature delivery, and code quality in a remote engineering team [add specifics]

Team Lead / Senior Mobile Engineer | Akvateq — Karachi, Pakistan

May 2022 – Apr 2026

- Led a mobile team of 3 within an ~18-person cross-functional team; owned architecture, code quality, and delivery planning
- Adopted an AI-first workflow (Cursor, OpenCode, Antigravity) to accelerate scaffolding, refactors, and test generation across the codebase
- Introduced TDD practices and built out unit, integration, and Detox E2E test suites to raise release stability
- Shipped white-label, multi-tenant mobile apps with custom native modules for VoIP, maps, and live GPS tracking

Lead Mobile Engineer — Knockio (Core Product) | Akvateq

Sep 2023 – Apr 2026

- Architected a production CRM and field-operations platform (React Native CLI) used by D2D sales teams nationwide
- Built real-time messaging, Twilio VoIP calling (CallKit on iOS, FCM/Notifee on Android), and live GPS tracking
- Built a custom native module for Mapbox turn-by-turn navigation; implemented territory clustering and route planning
- Delivered white-label multi-tenant theming for multiple client deployments from a single codebase
- Drove TDD adoption and E2E coverage (Detox); shipped a high-performance Kanban board and an OTA update pipeline (CodePush)

Mobile App Developer (React Native) | SudoWare — Karachi, Pakistan

Nov 2020 – Dec 2021

- Built cross-platform apps (React Native / Expo) with Google Maps integration — geolocation, routing, live tracking
- Optimized REST API usage for performance and reliability across app screens

EDUCATION

BS Computer Science, Iqra University, Karachi

2016 – 2020
