PROFESSIONAL EXPERIENCE

Lead Mobile Engineer (Knockio Core) / Team Lead — Akvateq	Karachi, Pakistan May 2022 – Present
- Lead mobile architecture and manage a squad of 3 engineers within an 18-person agile team; oversee sprint delivery and code reviews. - Architected Knockio (Core Flagship Product), an enterprise CRM & field-ops platform (React Native CLI) deployed nationwide. - Engineered real-time Twilio VoIP calling (iOS CallKit, Android Notifee/FCM), handling 500+ daily calls. - Built custom native bridges (Swift/Kotlin) for Mapbox turn-by-turn navigation, live GPS tracking, territory clustering, and route planning. - Delivered a multi-tenant white-label theming engine, enabling instant branding and automated client deployments from a single codebase. - Pioneered TDD adoption and Detox E2E test suites, reducing critical regression bugs by 45% and elevating release stability. - Implemented an automated OTA pipeline via CodePush, cutting hotfix distribution cycles from 48 hours to under 15 minutes.	
Lead Mobile Engineer (Advisory & Delivery) — Gotech	Remote / Part-Time May 2025 – Present
- Provide technical oversight, architectural direction, and code quality governance across mobile development teams. - Supervised modular refactoring and state optimization in React Native, improving cold-start launch times by ~30%. - Mentored engineers in adopting AI-first development workflows (Cursor, Claude) and enforced automated testing standards.	
Mobile Application Developer — Talkgenie AI	Karachi Apr 2026 – Jun 2026
- Built and shipped TalkGenie AI while working at Akvateq — context-aware AI customer support chatbot app powered by LLMs & Supabase. - Handled the React Native app end-to-end, from architecture and UI development to release on the App Store and Play Store. - Integrated LLM responses into chat with conversational context; configured Supabase backend for real-time data, auth, and production stability.	
Mobile App Developer (React Native) — SudoWare	Karachi, Pakistan Nov 2020 – Dec 2021
- Developed cross-platform mobile apps (React Native / Expo) with Google Maps API integration for real-time geolocation and tracking. - Optimized REST API consumption and local SQLite caching, cutting network latency and enhancing UI fluidity.
